

PDPM Master Class Series: Applying Dollar Values to PDPM Characteristics & Avoiding Top Missed Opportunities *with Case Studies*

Series Title: PDPM Master Class (12-month series)

Session Title: Applying Dollar Values to PDPM Characteristics & Avoiding Top Missed Opportunities *with Case Studies*

Presentation Dates: March Live Webinar

Presented By: (see attached bios)

- Eleisha Wilkes
- Shelly Maffia
- Amie Martin
- Kristen Walden

Course Description:

This session of the PDPM Master Class Series will focus on the financial implications of coding (or failing to code) various PDPM characteristics through a review of high risk variables impacting PDPM reimbursement. Actual PDPM audit trends and case studies will be reviewed to identify areas of potential missed opportunity, process lapses, and supportive documentation vulnerabilities. Operational strategies to promote PDPM compliance and coding accuracy in high impact areas will be emphasized.

Learning Objectives

1. Identify common coding errors and supportive documentation vulnerabilities related to PDPM reimbursement.
2. Review key operational strategies to drive compliance, coding and supportive documentation accuracy under PDPM in priority areas

Course Content

35 minutes	Review PDPM relevant patient characteristics that are high risk for coding and/or supportive documentation errors and the corresponding rate impact for those variables using audit case studies
35 minutes	Discuss best practices, facility processes, and key operational strategies to reduce missed opportunities and errors and to prioritize key action items based on the potential impact to the facility
5 minutes	Closing Comments/ Q&A

Target Audience: Administrators, Directors of Nursing, Nursing, QA, MDS, Staff Development, Therapy, Social Services, Board Members, CFO/Business Office

Instructional Level: **Intermediate** **Contact Hours: 1.25**
