

PDPM Master Class Series: Care Planning for the Complex Resident Under PDPM

Series Title: PDPM Master Class (12-month series)

Session Title: Care Planning for the Complex Resident Under PDPM

Presentation Date: June 2020 Live Webinar

Presented By: (see attached bios)

- Eleisha Wilkes
- Shelly Maffia
- Amie Martin
- Kristen Walden

Course Description:

This session of the PDPM Master Class Series will review regulatory requirements related to Baseline and Comprehensive care planning with focus on developing effective person-centered care plans that address complex care and services provided. This webinar will focus on ensuring appropriate care plan development related to the resident's SNF admitting diagnosis and PDPM Clinical Category, comorbid conditions, and skilled services provided to promote positive resident outcomes and support coding decisions on the initial Medicare assessment.

Learning Objectives

1. Review regulatory requirements related to Baseline and Comprehensive care planning
2. Identify potential care planning needs that will address the resident's SNF admitting diagnosis and PDPM Clinical Category as well as comorbid conditions and services provided
3. Develop processes to promote effective baseline care planning and support coding decisions on the initial Medicare assessment

Course Content

20 minutes	Overview of regulatory requirements related to care planning
30 minutes	Review of PDPM Clinical Categories and care planning considerations for primary diagnosis, comorbidities, and complex conditions
